The large heavy lift derrick places the 1,200 ton CA01 module into the nuclear island of Vogtle Unit 3. Two Westinghouse AP1000 nuclear units with approx. 1,117 MW each are currently under construction at the Vogtle site, Burke County, Georgia, in the south-eastern United States. Commissioning is expected for 2019 and 2020, respectively. (Courtesy: Georgia Power Company)
